WORK EXPERIENCE

Ceiia
Software Engineering / Team Lead / Software Architect / DevOps
Jan/2021 - Present

As **Software Architect**, I led the design and implementation of a configurator called AIOPS, which enables the setting up of tenants, features, roles, and permissions as well as the sharing of the same code base across many projects.
As the backend **Team Lead**, I ensured that best development practices were followed, provided technical leadership, coordinated activities, performed code reviews and improved development workflows to increase team output and code quality.
As **DevOps**, I created and managed all of the AIOPS infrastructure, guaranteeing its high availability, security, and scalability.

OMNIA - Low Code Platform
Software Engineer
Jan/2020 - Dec/2020

As a **Software Engineer**, I developed and maintained the platform, introducing new features that improved the overall functionality and usability of the system.

BIT
Backend Engineer
Mar/2017 - Dec/2019

As a **Backend Engineer**, I developed key features for the OMS of Continente Online Website, such as Multi Order Picking, Leveling Box, Routes integration, and a pre-invoice system. These features optimized the performance of the logistics operation.

EDUCATION

ISEP
Postgraduate - Software Engineering
2012-2014

ISEP
Graduate - Software Engineering
2008 - 2012
